**HPV: Human Papilloma Virus Vaccine**

Is your teen protected? by the HPV Vaccine? Did you know it can prevent cancer? Human Papillomavirus. As parents, you do everything you can to protect your children's health now and for the future. Today, there is a strong weapon to prevent several types of cancer in our kids: the HPV Vaccine. HPV vaccine is recommended for preteen girls and boys at age 11 or 12 years. HPV vaccine is also recommended for girls ages 13 through 26 years and boys 13 through 21 years who have not been vaccinated. If your son or daughter hasn't started or finished the HPV vaccine series- it's not too late!! Talk to your doctor about getting it for them.
